

GREEN

It's in our veins

Care and concern for the world we live in is part of the core values of Ghent. Preserving the natural environment for future generations requires a commitment to making responsible environmental choices.

Ghent will not be associated with the products or processes that are harmful to the environment. Through continuous improvement efforts, we work to reduce our environmental and energy footprints by acting on opportunities for environmental improvements and energy conservation as soon as they are discovered. We seek raw materials for our products that can be recycled. We recycle scrap or waste materials whenever possible and continually work to prevent pollution throughout our operations.

Each Ghent employee is expected to go beyond the minimum standards set by environmental compliance laws and is encouraged to advise his or her supervisor promptly of any situation that may conflict with this Policy.
