a GMI company.

Function Meets Elegance with Coda

Look back on glass of the past, and create a sense of balance with Coda Circle Glassboards. Art and function come together in concert to create an attention grabbing visual communication tool. Coda low profile glassboards achieve the look of weightless, floating glass with the absence of visible hanging hardware or stand-offs, allowing the beauty of the glass to complement any décor.

Aesthetic

1/4" tempered safety glass with concealed hanging hardware floats just 1/2" off the wall, creating a clean, uncluttered look.

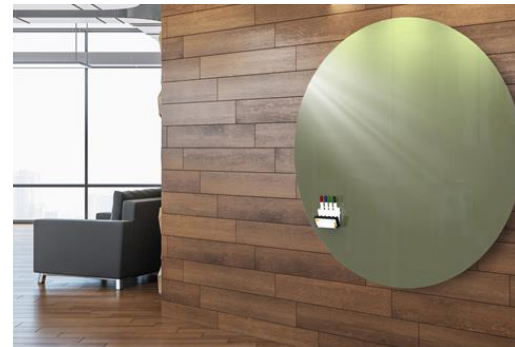

Possibilities

Place a single Coda for personal offices and conference rooms, or create an art installation using different colors and sizes.

Functional

Available in both magnetic or non-magnetic surfaces, use rare earth magnets to create a clean, easy-to-use canvas for your ideas.

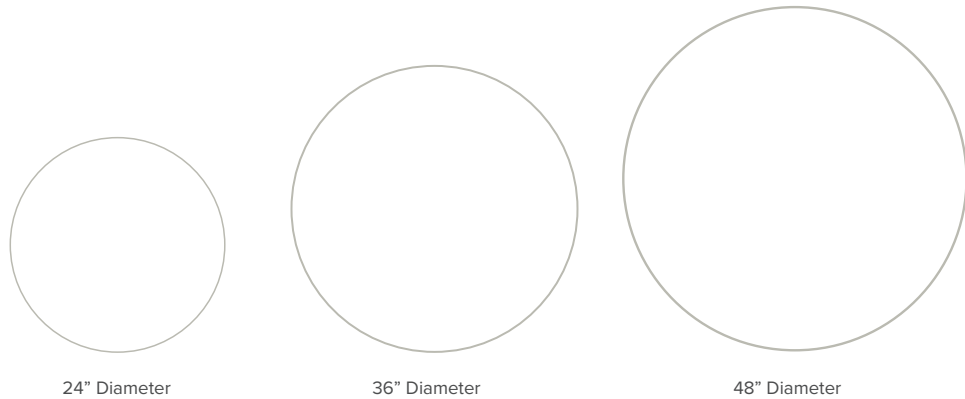

Integrated

Each Coda purchase includes 4 markers, an eraser, and a holder which can be mounted on the board or the wall.

Coda Low Profile Glassboards
