

FLYTE™

Frameless Writing Surfaces for
Modern Collaboration

ghent.

LET YOUR IDEAS TAKE FLYTE™

Flyte is the latest innovation in writing surfaces—a groundbreaking dry erasable material that redefines performance and sustainability. Constructed using a structured aluminum core, the finished steel surface will not bow or warp. Created with options for innovative wall mounting, matte or gloss finishes, and mobile solutions to complete your space.

Designed for boundless creativity, ideas can take Flyte.

Lightweight by Design

Ultralight core construction makes Flyte easier to install, move, and integrate into flexible spaces.

Frameless Aesthetic

Minimal edge-to-edge writing surfaces complement modern interiors without visual distraction.

Flexible Collaboration

Wall-mounted and mobile solutions adapt to meeting rooms, studios, classrooms, and agile workspaces.

Built Better

Using our proprietary GUV gloss or matte surface, Flyte resists ghosting and is fully recyclable.

The Flyte™ Collection

Collaboration should move as freely as ideas do. The Flyte Collection transforms visual communication through lightweight materials, frameless design, and adaptable functionality that integrates effortlessly into contemporary interiors. Designed to work beautifully across permanent and flexible spaces alike, Flyte creates a more refined experience for the modern workplace.

Duo

The first of its kind, Flyte Duo is a double-sided, wall-mounted whiteboard. Installed with magnets, the surface can easily be flipped over from gloss for everyday use to matte for projection.

Solo

Combining sleek elegance with high function, Flyte™ Solo is a frameless whiteboard built for boundless possibilities. Mounted using french cleats, you can feel confident in the durability and longevity of the surface.

Mobile

Flyte Mobile brings the lightweight performance and clean aesthetic of the Flyte Collection into a flexible mobile format. Featuring a frameless magnetic writing surface and locking casters, it moves effortlessly through various workspaces without compromising design.
